DILAN

- **\$30k month** running a lead-gen agency for US contractors
- **4.5x views a month** from the content system I built: 2.7M in 60 days
- **~13 minutes** to fully build a new agency client from one Discord message
- **7 Grade 9s** at City of London School (basically an A**)

AERIS

- **#5 contractor in Georgia** (ABC rankings)
- **\$500k to ~\$2M** government and military-base projects
- **\$50k profit** in a single month
- **Signed to Kanye West's record label**, GOOD Music
- **BA Graphic Design & Illustration**, Watkins College of Art (Belmont)
- **Coding since 2013**

Between us, we make up both sides of the relationship that lets agencies like the ones AI Frontrunners members run scale: the agency, and the local business it works for.

Dilan Lieberman, 19

CO-FOUNDER

I know GoHighLevel inside out, and I'm very comfortable in Meta Ads Manager and Meta Business Manager. Fluent in ElevenLabs, Supabase, CapCut, VPS setup, video editing and production, content, prompting and building AI agents.

Pinnacle Consulting, Founder

March 2025 to present

Lead gen for US home-service contractors: Meta ads, SEO, AEO, full GoHighLevel buildouts, CRM and sales automation.

- Took it to \$30k in my best month (August 2025, out in Miami).
- Built an onboarding bot so a new client goes from one Discord message to a finished GoHighLevel build and a Meta campaign in about 13 minutes: branded funnel, calendars, custom fields, statics, video ads with ElevenLabs voiceover and Submagic captions, zip-code targeting with exclusion radiuses.
- Automated GoHighLevel sub-account setup and A2P.
- Built client websites with AI for SEO and AEO.
- Plus the tools around it: a phone-verified lead uploader, a Discord bot that makes b-roll video ads on command, setter alerts in Discord, and a client ad dashboard fed by Meta.

Zing Financial, Founder & CEO

2026 to present

A card for online founders and agency owners. Delaware C-corp, about 9 months from launch.

- Account is 4 months old. About 300k views a month before the content system, about 1.35M a month after (4.5x): 2.7M views in 60 days.
- Automated the flow of new interviews to our editors, with Claude Opus editing the videos, so new content goes out every day.

City of London School

GCSEs

- Seven Grade 9s, one 8 and one 7, across 9 subjects. The 8 and the 7 were each one mark off.

I have ADHD, so I was allowed my laptop in class, and I spent most of school either gaming or grinding on business. Then I locked in, taught myself the hardest version of every syllabus, and got the grades. I literally didn't feel any pride, so I locked in on an agency instead.

Coding since 2013. Builds in Base44, VS Code, Codex and Claude.

Pinnacle Consulting, Co-founder

2026 to present

- Built a commercial lead-gen platform: filter by location, every lead enriched with ATTOM property data. Texas alone shows about \$8M in pipeline.
- Built QuantexGen: tell it what you need (a SaaS dashboard, landing page, store, AI agent, mobile app or API service) and Architect, Builder and Debugger agents plan it, build it, fix it and deploy it.
- Mentored by an Apple engineer in Silicon Valley.

Top Tier Roofing and Renovations, Owner

2024 to present

In the roofing industry since 2019.

- Ranked the #5 contractor in Georgia by ABC, the roofing materials company, off residential insurance work.
- Then went commercial: government contracts and military bases, \$500k up to around \$2M a project, flying crews all across the US.
- Brought home \$50k profit in a single month.

Before roofing

- BA Graphic Design & Illustration from Watkins College of Art in Nashville (now part of Belmont University), majoring in visuals and realism.
- At the height of his music career, before the pandemic, he was signed to Kanye West's record label, GOOD Music.

Agentic coding brought him back to the visuals he majored in. Father of twin boys.

SELECTED WORK (videos linked in the application)

- **Intro, Dilan and Aeris:** who we are and what we build.
- **Agency onboarding bot (Dilan):** one Discord message to a live GoHighLevel build and Meta campaign, plus the tools around it.
- **Zing content system (Dilan):** 4.5x the views a month, and the system behind it.
- **A website I built for a client (Dilan):** candmrenovations.com
- **Commercial lead-gen platform (Aeris):** filter by location, ATTOM-enriched leads.
- **QuantexGen (Aeris):** Architect, Builder and Debugger agents that build and ship software.
